

Production Resource Group (PRG) is the market leader for audiovisual solutions in the event sector. Our teams carry out the most challenging and groundbreaking projects. From touring and festivals, car shows, television and theater, to sports and large public events - PRG takes care of the concept until implementation, with the most creative and advanced production solutions available on the market.

PRG has more than 3,000 employees, active in more than 40 locations worldwide.
For our branch in Tildonk we are looking for:

Light Technician – (m/f)

YOUR FUNCTION

- You are partly responsible for the fulfillment of national and international projects.
- You are responsible for the installation and dismantling of light installations, operating light consoles, working with different moving light heads, ...
- During the job you usually stay on location for the operation of the installation and you respond to the needs and questions of the customer / client.
- Maintenance of the light park in cooperation with the warehouse manager.

YOUR PROFILE

- You have a broad technical background and a first experience in the AV branch in relation to light installations.
- You have interest / knowledge of the latest light technologies and are up to date with the latest standards in light fixtures, moving heads, light consoles,
- You can easily express yourself in Dutch / French / English and computers have little secrets for you in Soft- and hardware.
- You have good social skills and can adapt to different environments and types of clients.
- You are enthusiastic, stress-resistant and flexible in work attitude (about last-minute changes and temporary projects abroad). You can work independently as well as in a team.

OUR OFFER

- We offer a full-time job in a young dynamic work environment.
- A salary in accordance with experience, supplemented with extra-legal benefits.
- There are enough training opportunities (internal and external) available.
